AGILE TEAM CHARTER

Power-Share: Load Shedding Business

Team Members

- Ephraim Ebenezer Kouakou – Team Leader & Presenter

- Magdeline Malahlela – Designer

- Mojalefa Mabotja – Researcher

- Refilwe Mabena – Writer/Editor

1. Team Purpose

Objective:
The objective of our team is to design and develop a business solution called Power-Share, which provides affordable portable power rentals to micro-entrepreneurs affected by load shedding. The goal is to help small businesses continue operating during power outages and reduce income loss.

Vision Statement:
To empower township entrepreneurs by providing reliable, affordable, and accessible backup power solutions that ensure business continuity and financial stability during load shedding.

2. Roles and Responsibilities

Name	Role	Responsibilities
Ephraim Ebenezer Kouakou	Team Leader & Presenter	Coordinates team activities, manages deadlines, leads presentations
Magdeline Malahlela	Designer	Designs visuals, flyers, and UI concepts for the project
Mojalefa Mabotja	Researcher	Conducts market research and gathers relevant data
Refilwe Mabena	Writer/Editor	Writes, edits, and compiles all documentation

3. Team Values and Principles

Core Values:
Collaboration, Respect, Accountability, Transparency.

Agile Principles:
Deliver working solutions quickly, adapt to feedback, focus on customer needs, maintain teamwork and communication.

4. Communication Plan

Communication Method	Details
WhatsApp Group	Primary communication channel for daily updates and coordination
In-person Meetings	Weekly meetings on campus to discuss progress
Shared Documents	Google Docs or Word for collaboration and document sharing
Meeting Frequency	At least once a week and before submission deadlines

Communication Method	Details
Progress Tracking	Task updates and progress shared in the team group

5. Goals and Milestones

SMART Goals:

• Specific: Develop and test the Power-Share portable power rental service for township entrepreneurs.

• Measurable: Gain at least 20 WhatsApp group members and 5–10 pre-orders during MVP testing.

• Achievable: Use low-cost marketing (flyers, WhatsApp) and direct engagement in local business hubs.

• Relevant: Addresses load shedding challenges affecting small business income.

• Time-bound: Achieve MVP validation within 1–2 weeks of testing phase

Milestone	Description	Timeline
Project Idea & Research	Identify the problem (load shedding) and define the Power-Share solution	Week 1
Marketing Strategy Development	Define target market, customer needs, and marketing channels	Week 2
MVP Design (Flyers & Setup)	Create flyer, WhatsApp group, and prepare for testing	Week 3
MVP Testing (Customer Outreach)	Engage with entrepreneurs and collect pre-orders	Week 4
Feedback Collection & Improvement	Analyze responses and refine the business idea	Week 5
Final Submission & Presentation	Compile final report and prepare presentation	Week

6. Working Agreements

All members must meet deadlines, communicate early, respect meeting times, and contribute actively.

7. Conflict Resolution

Issues will be discussed openly. If unresolved, the team leader mediates. If needed, escalate to the lecturer.
